NETWORK SECURITY, CAREER AND TECHNICAL CERTIFICATE

The CTC in Network Security is a short-term credential that includes valuable industry certifications (CompTIA's A+, Network+, and Security +). Together, these three certifications help an individual partially meet Department of Defense 8570 baseline certification requirements, which are important to companies during the hiring process and when submitting proposals to secure government contract work. This CTC is contained within the Information Assurance and Cybersecurity degree curriculum, allowing students to earn a CTC and then continue to work towards the Associate of Applied Science.

Code	Title	Hours
