

# WELDING

---

Skilled Welders are always in high-demand. Basic welders, like tack welders, fuse metals together with heat, while more skilled welders like construction and fitter welders work in more complex environments, joining beams and other structures, or assembling and repairing piping systems.

The Certificate of Technical Studies program gives students the knowledge they need to start out in any of the many career options for welders.

**Available Programs:**

- Career and Technical Certificate, Shielded Metal Arc Welding
- Certificate of Technical Studies, Intermediate Welding
- Technical Diploma, Combo Welder

For information on non-credit/workforce training welding courses at Nunez Community College visit [www.nunez.edu/admissions/Workforce-Development](http://www.nunez.edu/admissions/Workforce-Development) (<https://www.nunez.edu/admissions/Workforce-Development/>).
